NOTES

1. Dimmers 82 and 83 should be kept as spares with 84 powering the Pars with the Threefer plugged directly into the dimmer with slack on each end of the runs.

2. The S4 minis should both be powered from the SL side with the remaining dimmer run up to the grid.

3. All Fixtures should be yoked straight out, SR UNI 8 and SL UNI 8 should have their bottom fixture be at 9' and the next right above it with minimal gap between.
